"I am a homeowner who read about VaporRemed on the Internet and decided to take a chance on it. We'd removed an old oil tank from our basement, and the area (dirt floor) still smelled bad several months later. When the VaporRemed arrived, I poured it into a sprayer, put on goggles and a face mask for safety, and applied it to the affected area. Within 30 minutes the oil smell was gone! One month later, the smell has not returned. (VaporRemed did leave a slight, lingering aroma similar to baking soda, but it is not unpleasant.) The problem is completely solved. It is great to encounter a product that works EXACTLY as claimed."
