### What about the fumes, Bob?

As one of our customers says, "we felt all alone after the cleanup crew left leaving strong smell in the house". You are not alone. VaporRemed<sup>®</sup> is your friend indeed. VaporRemed<sup>®</sup> eliminates heating oil fumes almost instantly, permanently and in environmentally safe manner. In the unlikely event of an oil spill in your home or your customer's homes, insist on using only the best. Use VaporRemed<sup>®</sup> for all your post-spill cleanup needs.

### Advantages of VaporRemed

VaporRemed	Conventional Methods
Fuel oil fumes gone in minutes	Requires minimum blowing air for 12 – 16 weeks
Minimum disturbance to the environment	Causes major disturbance to environment
Simple to use. Available in a Ready To Use form.	Requires qualified operators for excavators, trucks etc.
No waste for disposal	Expensive waste disposal
No transport required for disposal	Trucks with hazmat permits required
Minimum health risk	Major construction activity requiring emphasis on H & S
Minimum capital outlay	Major outlay on excavators, trucks etc.

**VaporRemed®**  
Fuel oil Fumes Gone in Minutes

**Success Stories**

**I: A spill in a basement in Ohio**

Excavated pit sprayed with VaporRemed® removed fumes in minutes.

New furnace installed in less than three weeks after treatment with VaporRemed®

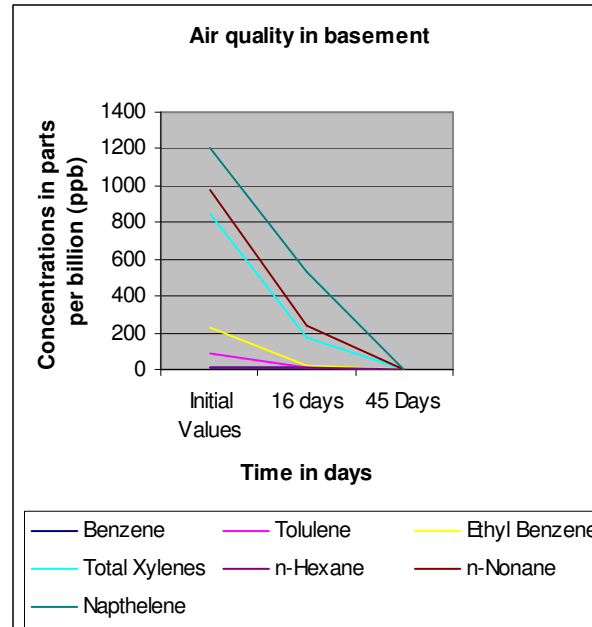

**VaporRemed®**  
Carry wherever you go  
In rain or in snow

**2: Mitigation of fumes**

After an oil spill in a Virginia residence, fuel oil was trapped in the cinder block wall and the fuel oil fumes migrated to the living room. VA DEQ approved treatment with VaporRemed® and after first injection, the fumes were eliminated permanently.

**3: Indoor Air quality after VaporRemed spray**

Another residence in Virginia, had persisting fumes in the basement and the first floor from an earlier spill. Even after the clean up and sealing the basement, fumes remained. In less than two months, all gaseous hydrocarbon constituents were reduced below the limits of detection by VaporRemed®. (See figure below).

Customer Testimonials

**Flood Affected Customer, NY**

The VaporRemed product saved me 10's of thousands of dollars in environmental clean costs. Hurricane Sandy caused a fuel oil spill on my property including a crawl space under my home. After the initial fuel oil clean up there were still residual fuel oil fumes that prevented us beginning the rebuild of the interior of our home which got flooded. I discovered VaporRemed by accident in a local plumbing supply house. I contacted Sarva Bio Remed LLC to order vaporremed. Realizing the serious situation we were in Dinkar actually loaded up his van with Vaporremed and delivered it personally to my home. This was no easy feat as I live 2.5 hrs away and traffic in the NY metropolitan after hurricane Sandy was disastrous. Matthew Dazzo, 2012.

**Home Heating Oil Company, PA**

We had an ongoing issue with an oil smell in basement. We scrubbed the effected concrete floor several times and sprayed various odor suppressants to no avail. An oil smell still lingered. An Environmental Company told us of VaporRemed. We used this product with instantaneous results!! This is a "must have" for any oil company! irt. Ordering was simple through their website and delivery was the next day. Thank you for this product. It bailed me out of an insurance claim and salvaged my relationship with a good customer. Tony M, Yeager's Fuel, PA 2016

**Recovery of pets, MD**

"Thank you for your immediate response in sending the VaporRemed. We had an open fuel oil tank (the pipes were removed) and strong oil fumes inside our home. Our dog and cat became ill within a few hours. Upon receiving and spraying the VaporRemed, the fumes quickly disappeared and the animals recovered. ... thanks for creating such an amazing product! Denise, Maryland (Home owner), 2009
